## OSTEOPATHIC PHYSICIANS (DOs)

### THE OSTEOPATHIC MEDICAL PROFESSION

Developed more than 130 years ago by Andrew Taylor Still, MD, DO, osteopathic medicine brings a unique philosophy to traditional medicine. With an emphasis on the inter-relationship of the body's nerves, muscles, bones and organs, osteopathic medical school curriculum prepares osteopathic medical students to apply the philosophy of treating the whole person to prevent, diagnose and treat illness, disease and injury.

Osteopathic physicians (DOs) are fully-licensed to prescribe medicine and practice in all specialty areas including surgery. DOs are trained to consider the health of the whole person and use their hands to help diagnose and treat their patients.

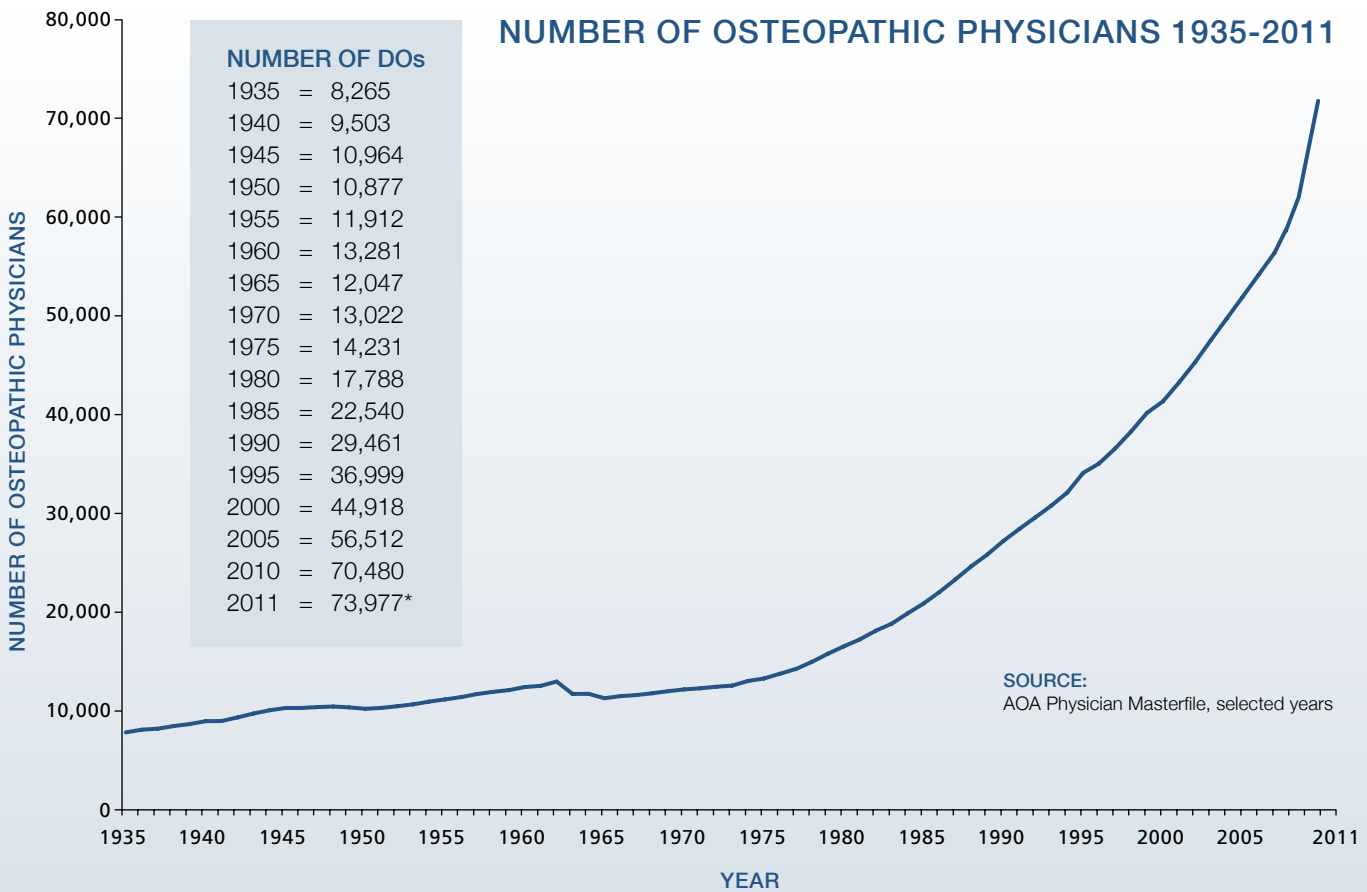

**As of May 31, 2011**  
Number of DOs: 73,977\*

Estimated number of DOs  
in active practice: 66,440

\* This number does not include the 2011 osteopathic medical school graduates. Including an estimated 4,200 graduates, there are more than 78,000 DOs in the United States.

### GROWTH IN OSTEOPATHIC PHYSICIANS

DOs are one of the fastest growing segments of health care professionals in the United States. At the current rate of growth, it is estimated that more than 100,000 osteopathic physicians will be in active medical practice by the year 2020. The graph below shows the exponential growth in the number of DOs since 1935.

\* This number does not include the 2011 osteopathic medical school graduates. Including an estimated 4,200 graduates, there are more than 78,000 DOs in the United States.

### AS OF MAY 31, 2011

Number of accredited OPTIs: 20  
 Approved Internship Training Programs: 134  
 Approved Internship Training Positions: 1,284  
 Approved Residency Training Programs: 827  
 Approved Residency Training Positions: 9,110

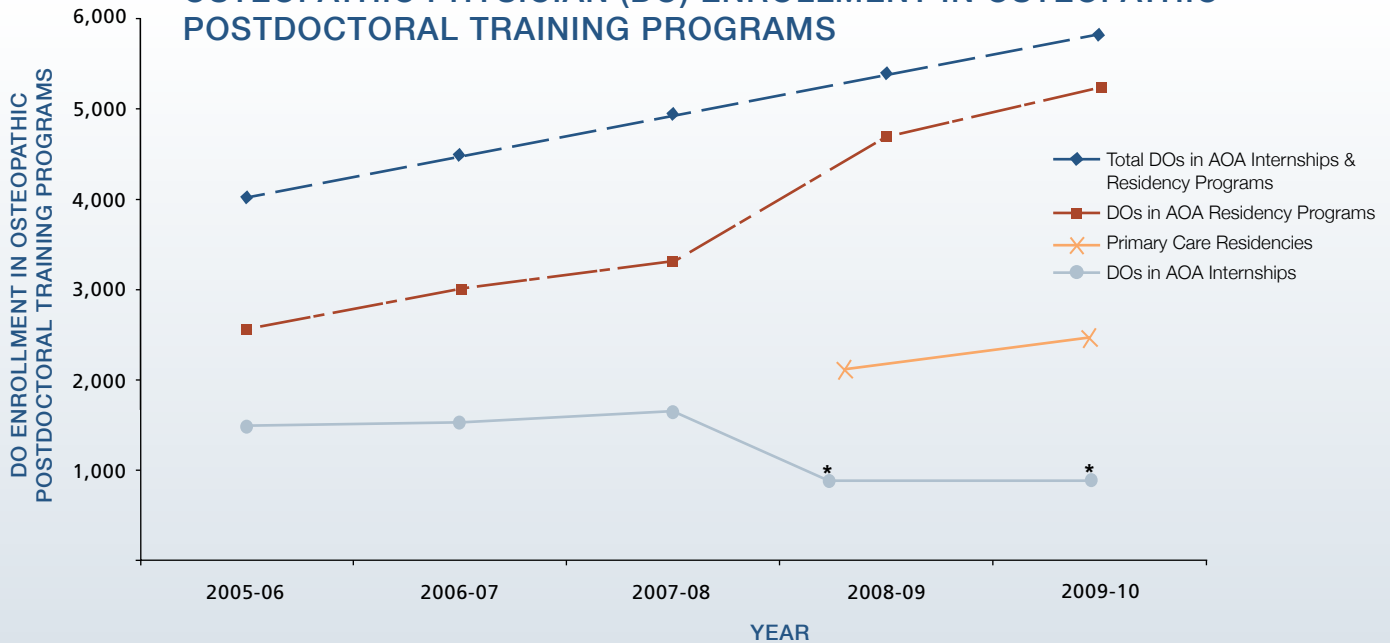

## OSTEOPATHIC POSTDOCTORAL TRAINING INSTITUTION & PROGRAM ENROLLMENT

The American Osteopathic Association (AOA) established the Osteopathic Postdoctoral Training Institution (OPTI) in 1995.

Each OPTI is a community-based training consortium comprised of at least one college of osteopathic medicine and one hospital. Other hospitals and ambulatory care facilities may also partner within an OPTI. Community-based health care facilities such as ambulatory care clinics, rehabilitation centers and surgicenters now have the resources and support necessary to provide physician training with an OPTI's assistance.

The following graph and table illustrate the growth in osteopathic physician enrollment in postdoctoral training programs for each academic year since 2005-06. They also illustrate the growth in number of DOs in primary care residencies. Today, over 46% of DOs in AOA residency programs are in primary care residencies, which include general practice, family practice, pediatrics, internal medicine, and obstetrics/gynecology.

### OSTEOPATHIC PHYSICIAN (DO) ENROLLMENT IN OSTEOPATHIC POSTDOCTORAL TRAINING PROGRAMS

	2005-06	2006-07	2007-08	2008-09	2009-10
Total DOs in AOA Internship & Residency Programs	4,020	4,514	4,934	5,369	5,805
DOs in AOA Residency Programs	2,535	2,989	3,289	4,794	5,247
DOs in AOA Internships	1,485	1,525	1,645	605*	558*
DOs in Primary Care Residencies				2,117**	2,426

**SOURCE:** AOA Intern/Resident contracts received by AOA Department of Education and AOA's Trainee Information, Verification, and Registration Audit System for academic year shown.

\* In July 2008, the AOA restructured the first postdoctoral year of training. As a result, most first year positions are now offered as residency positions; though internships are still required in certain specialties. Prior to 2008, all AOA first year postdoctoral training was classified as an internship.

\*\* Prior to 2008-09 trainees spent the first year of training in an AOA Internship program.

## DIVERSITY AMONG OSTEOPATHIC PHYSICIANS

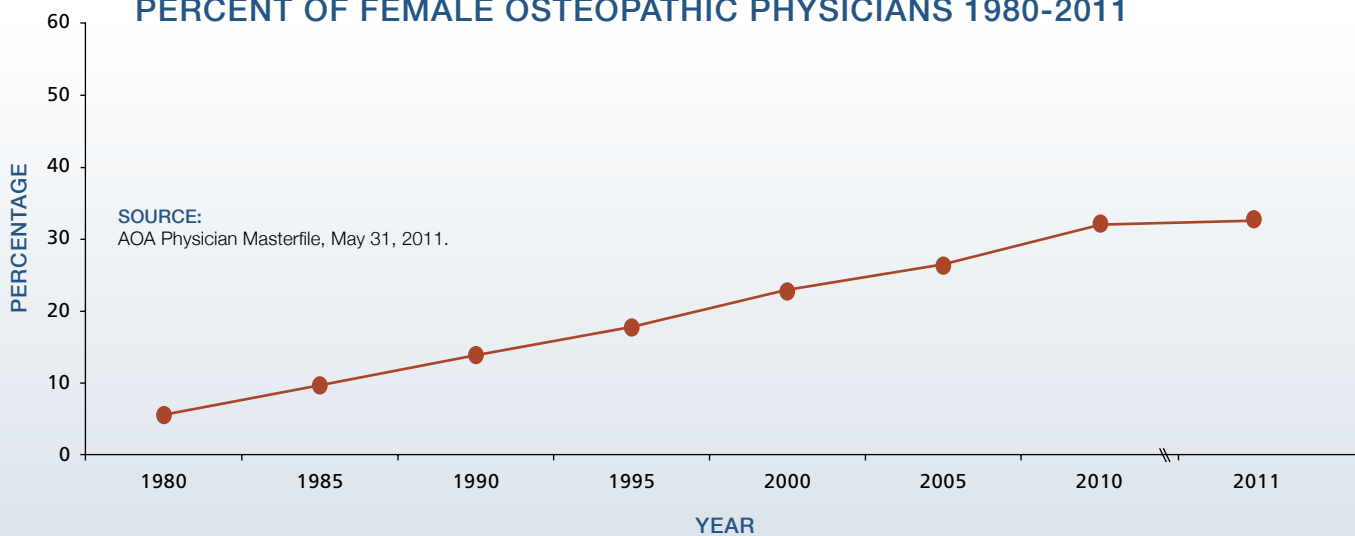

### GROWTH IN FEMALE OSTEOPATHIC PHYSICIANS

Since the first class convened at the American School of Osteopathy in 1892-1893, women have been a part of the osteopathic medical profession. During the past 26 years, the percentage of female DOs within the entire DO population has increased by almost 250%. Today, women account for over a third of all DOs and this number is expected to continue to rise as more and more women enroll in osteopathic medical schools around the U.S.

### PERCENT OF FEMALE OSTEOPATHIC PHYSICIANS

	1985	1990	1995	2000	2005	2010	2011*
DOs	9.7	13.9	17.9	22.8	26.7	32.0	32.9

### PERCENT OF FEMALE OSTEOPATHIC PHYSICIANS 1980-2011

The table below further illustrates the increase in female osteopathic physicians over the last 20 years. Today, almost half of all DOs in active practice four years or less after graduation are female.

### DOs IN ACTIVE PRACTICE BY NUMBER OF YEARS AFTER OSTEOPATHIC MEDICAL SCHOOL GRADUATION

# Years after Graduation	Female	Male	Total	% Female
0-4	6,789	6,962	13,751	49.4
5-9	5,866	7,536	13,402	43.8
10-14	4,141	6,919	11,060	37.4
15-19	2,852	5,609	8,461	33.7
20-24	2,107	5,430	7,537	28.0
25-29	1,310	4,889	6,199	21.1
30+	669	5,352	6,021	11.1
Total	23,734	42,697	66,431	35.7

SOURCE: AOA Physician Masterfile, May 31, 2011.

NOTE: Active practice includes all osteopathic physicians under the age of 65 who are not known to be inactive or retired.

### OSTEOPATHIC PHYSICIANS WITHIN THE U.S.

#### STATES WITH THE LARGEST DO POPULATION

DOs have historically been concentrated in a few states like Michigan, Pennsylvania and Ohio. However, in recent years this pattern has changed and DO populations are increasing distribution throughout all 50 states.

### DISTRIBUTION OF DOs IN STATES WITH TOP DO POPULATIONS

1984			2011*		
State	DOs	% of total DO population	State	DOs	% of total DO population
FL	1,373	6.4	OH	4,775	6.5
MO	1,375	6.4	NY	4,785	6.5
TX	1,476	6.8	CA	5,081	6.9

## OSTEOPATHIC PHYSICIAN SPECIALTIES

### DO DISTRIBUTION AMONG MEDICAL SPECIALTIES

Due to an aging U.S. population and the overall decrease in medical school enrollment, the country is facing an impending primary care physician shortage. In some states, there are only 1.5 primary care physicians for every 1,000 residents. Historically, DOs have helped to bridge this gap – and they continue to do the same today. In 2011, more than 60% of DOs are primary care physicians, meaning that they practice in any of the following specialties: general practice, family practice, pediatrics, internal medicine, and obstetrics/gynecology.

### SELF-IDENTIFIED DO PRACTICE SPECIALTIES, 1984-2011

Year	Family and general practice		General internal medicine		Pediatrics and adolescent medicine		Obstetrics		Osteopathic manipulative medicine (OMM) or osteopathic manipulative treatment (OMT) specialties		Other specialty	
	DOs	%	DOs	%	DOs	%	DOs	%	DOs	%	DOs	%
2011	22,834	39.0	7,481	12.8	3,284	5.6	2,698	4.6	811	1.4	21,402	36.6
2010	19,737	39.1	5,687	11.3	2,612	5.2	2,170	4.3	902	1.8	19,010	37.7
2009	18,964	40.9	4,620	10.0	2,178	4.7	2,001	4.3	813	1.8	17,613	38.0
2008	18,680	42.6	4,171	9.5	1,995	4.5	1,858	4.2	656	1.5	16,178	36.9

2005	17,800	46.3	3,107	8.1	1,176	3.1	1,465	3.8	464	1.2	13,431	34.9
2004	16,752	45.5	2,994	8.1	1,127	3.1	1,416	3.8	448	1.2	13,050	35.5
1994	10,136	44.8	1,487	6.6	560	2.5	754	3.3	753	3.3	8,048	35.5
1984	7,224	56.4	598	4.7	236	1.8	361	2.8	62	0.5	3,033	23.7

**NOTES/SOURCES:** The table includes only DOs in active practice and out of postdoctoral training. All DOs who graduated after Jan. 1, 2007, are assumed to be in an internship or residency. The AOA Masterfile and data licensed from the Association of American Medical Colleges were used to identify DOs in residency programs. "Pediatrics and adolescent medicine" include all specialties where the patient is a child or an adolescent and includes both general pediatricians and pediatric specialties. The categories "Family and general practice" and "General internal medicine" do not include family physicians, general practitioners and general internists who also practice secondary specialties. Those osteopathic physicians are counted under "Other Specialty." The category "OMT/OMM" includes family physicians who stress OMT in their practices in addition to osteopathic physicians who specialize in OMM. Board certifications were used when self-identified practice specialty was not available but this does not equate to the entire population of DOs.

### AS OF MAY 31, 2011, NUMBER OF AOA CERTIFYING BOARDS: 18

#### NUMBER OF DOs ACTIVELY BOARD CERTIFIED BY THE AOA

2006-07	2007-08	2008-09	2009-10	2010-11
20,877	22,205	22,395	23,001	23,885

## NUMBER OF SPECIALTY, SUBSPECIALTY AND AREAS OF ADDED QUALIFICATIONS POSSIBLE FOR AOA CERTIFICATION

2006-07	2007-08	2008-09	2009-10	2010-11

## OSTEOPATHIC MEDICAL STUDENTS

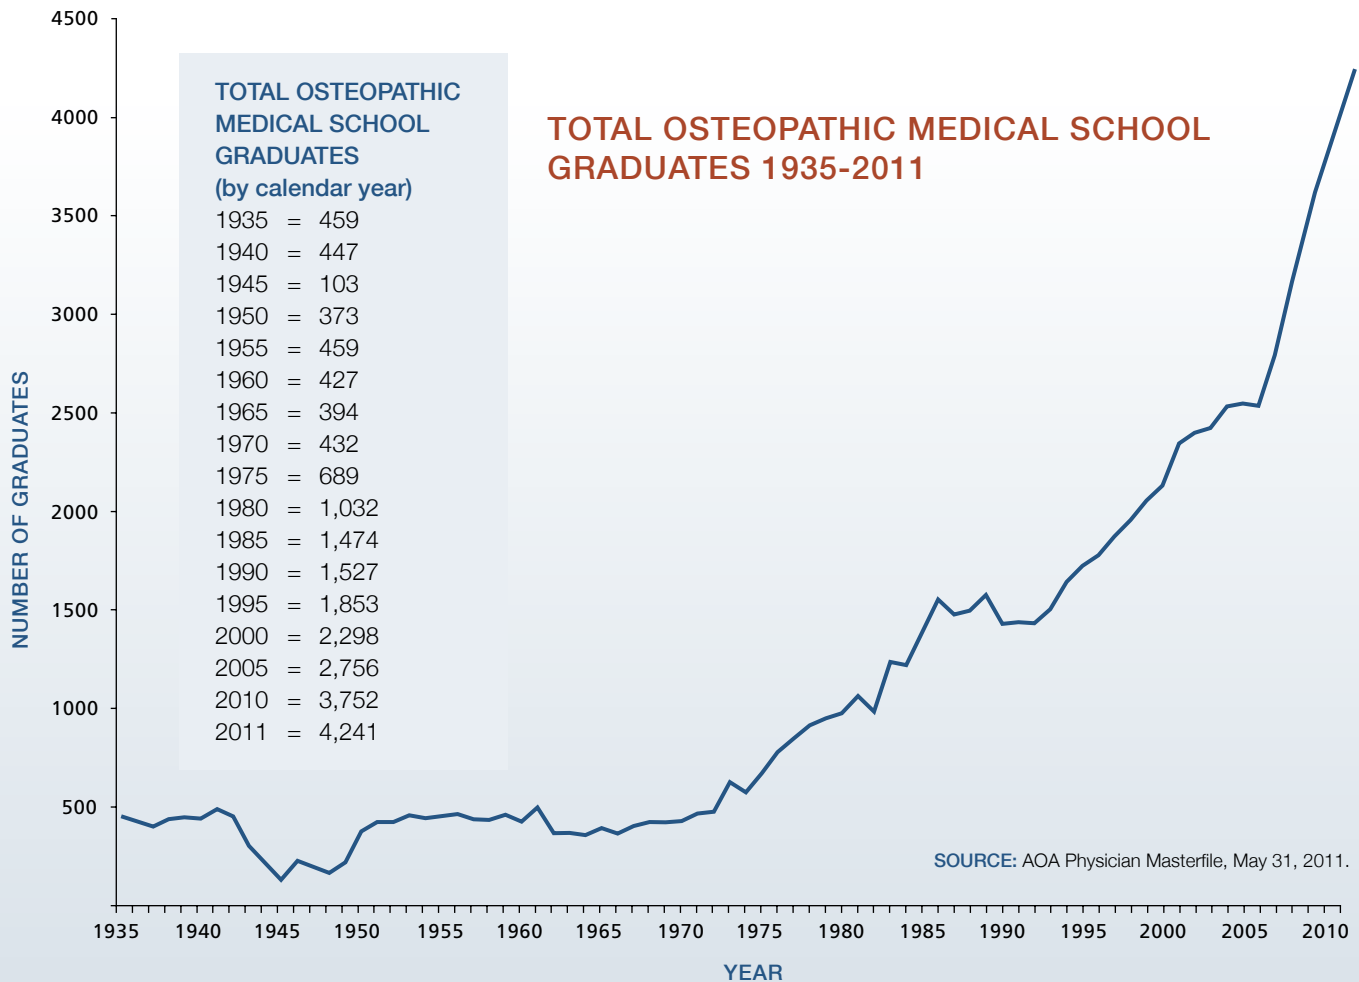

In addition to the DO population growth, the osteopathic medical student population is increasing. In fact, since the fall of 2003, seven new osteopathic medical schools, four new branch campuses, and four new additional locations have opened. The table below illustrates the growth in osteopathic medical school students each academic year since 2006-07.

### PERCENT INCREASE OF OSTEOPATHIC MEDICAL SCHOOL ENROLLMENT

	2006-07	2007-08	2008-09	2009-10	2010-11
Total enrollment	14,409	15,634	16,893	18,033	19,427
Change from prior year	↑ 7.5	↑ 8.5	↑ 8.1	↑ 6.7	↑ 7.7

**SOURCE:** Website of the American Association of Colleges of Osteopathic Medicine (AACOM), [www.aacom.org](http://www.aacom.org), accessed June 13, 2011. All osteopathic medical student statistics used with permission from AACOM.

The graph below illustrates the growth in osteopathic medical school graduates each calendar year since 1935.

## GROWTH IN COLLEGES OF OSTEOPATHIC MEDICINE ENROLLMENT

For a more detailed look at the increase in osteopathic medical school students, the table on this page reports the number of enrolled osteopathic medical school students for each osteopathic medical school or branch campus in the past five years, where applicable.

### OSTEOPATHIC MEDICAL SCHOOL TOTAL ENROLLMENT BY ACADEMIC YEAR

## DIVERSITY AMONG OSTEOPATHIC MEDICAL STUDENTS

### GROWTH IN FEMALE OSTEOPATHIC MEDICAL STUDENTS

While few career paths were open to women in the late 1800s, the first class to convene at the American School of Osteopathy in 1892-1893 included women. The number of female DOs increased until World War II, when female enrollment sharply decreased. However, by the 1960s women were again a prominent number in osteopathic medical schools. Today, women account for nearly half of the total enrollment in osteopathic medical schools.

### PERCENT OF FEMALE OSTEOPATHIC MEDICAL STUDENTS

	1985	1990	1995	2000	2005	2010	2011
Osteopathic Medical Students	27.2	32.7	36.3	41.1	49.6	47.6	47.2

**SOURCE:** Website of the American Association of Colleges of Osteopathic Medicine (AACOM), www.aacom.org, accessed June 13, 2011.  
 All osteopathic medical student statistics used with permission from AACOM.

While the percent of female enrollment in osteopathic medical schools has declined in recent years, the total number of female osteopathic medical students has steadily increased.

## TOTAL OSTEOPATHIC MEDICAL SCHOOL ENROLLMENT BY GENDER

Academic Year	# of Males	%	# of Females	%	Total Enrolled
2005-06	6,751	50.4	6,655	49.6	13,406
2006-07	7,163	49.7	7,246	50.3	14,409
2007-08	7,904	50.6	7,730	49.4	15,634
2008-09	8,678	51.4	8,215	48.6	16,893
2009-10	9,442	52.4	8,591	47.6	18,033
2010-11	10,259	52.8	9,168	47.2	19,427

## ETHNICITY OF OSTEOPATHIC MEDICAL STUDENTS

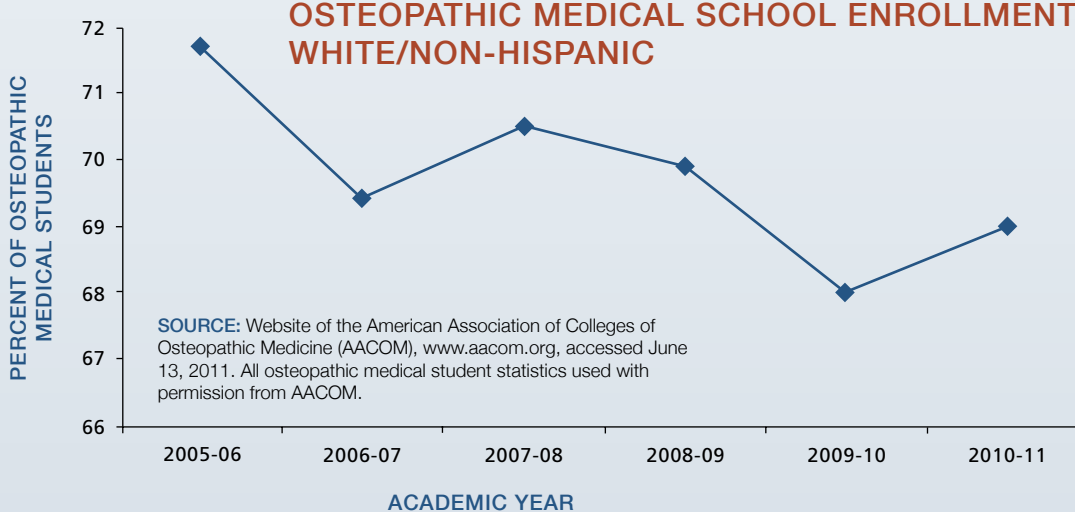

The diversity of osteopathic medical schools is not only represented in the female population. The American Association of Colleges of Osteopathic Medicine (AACOM) plays a critical role in encouraging all minorities to pursue a career in osteopathic medicine. The following graphs and table represent the declining percentage of White/Non-Hispanic osteopathic medical students and the increasing percentage of other ethnicities among enrolled osteopathic medical students.

## OSTEOPATHIC MEDICAL SCHOOL ENROLLMENT PERCENTAGE ASIAN/PACIFIC ISLANDERS; BLACK/AFRICAN AMERICAN; HISPANIC/ LATINO; NATIVE AMERICAN/ALASKA NATIVE

## OSTEOPATHIC MEDICAL SCHOOL ENROLLMENT PERCENTAGE WHITE/NON-HISPANIC

## TOTAL OSTEOPATHIC MEDICAL STUDENT ENROLLMENT BY RACE/ETHNICITY

Race/Ethnicity	2006-07	2007-08	2008-2009	2009-10	2010-11
Total White/Non-Hispanic	10,003	11,028	11,819	12,271	13,405
%	69.4	70.6	69.9	68.1	69.0
Total Asian/Pacific-Islander	2,394	2,713	2,895	3,014	3,774
%	16.6	17.4	17.1	16.7	19.4
Total Black/African American	588	600	595	540	576
%	4.1	3.8	3.5	3.0	3.0
Total Hispanic/Latino	551	569	626	619	664
%	3.8	3.6	3.7	3.4	3.4
Native American/Alaska Native	89	102	121	104	130
%	0.6	0.7	0.7	0.6	0.7
Total other or not entered**	784	622	845	1,485	878
%	5.4	4.0	5.0	8.2	4.5
Total	14,409	15,634	16,901*	18,033	19,427

\*2008-09 totals more than the 16,893 students because of multiple entries allowed.

\*\*In 2009-10, this category expanded to include "unknown," "non-resident alien" and "two or more races."
