How to Rebuild Your Practice: Now and After COVID-19
Before we begin

• We are living through a historic pandemic
• Thank you to the caregivers on the front lines
• Work hard to protect yourself and your loved ones
• This is not over, so continue to encourage social distancing
• How we act today will be remembered tomorrow
• Let’s get the word out together!

COVID-19’s Impact on Doctors and Practices
Physician Practice Patterns Changing As A Result Of COVID-19

• About half are using telemedicine (48%)
• 38% of physicians are seeing COVID-19 patients (of those, 30% of them feel great stress, but will continue to see patients)
• 60% of physicians who are not seeing COVID-19 patients are willing to do so
• 14% plan to change practice settings as a result of COVID-19
• 18% plan to retire, temporarily close their practices, or opt out of patient care

Source: Merritt Hawkins
The number of visits to ambulatory practices declined nearly 60 percent in mid-March and has remained low through mid-April.

Source: Ateev Mehrotra et al., “What Impact Has COVID-19 Had on Outpatient Visits?,” To the Point (blog), Commonwealth Fund, Apr. 23,
Nearly 30 percent of all visits at these ambulatory practices are now provided via telemedicine.

Percent of all visits provided via telemedicine

Source: Ateev Mehrotra et al., “What Impact Has COVID-19 Had on Outpatient Visits?,” To the Point (blog), Commonwealth Fund, Apr. 23,
As the number of in-person visits dropped, telehealth visits increased. But the increase in telehealth visits only partially offset the drop in in-person visits.

The decline among in-person visits is steeper than the decline among visits of any type (telemedicine and in-person).

Source: Ateev Mehrotra et al., “What Impact Has COVID-19 Had on Outpatient Visits?,” To the Point (blog), Commonwealth Fund, Apr. 23.
The decline in visits was generally larger among surgical and procedural specialties and smaller in other specialties such as adult primary care, obstetrics/gynecology, oncology, and behavioral health.

Source: Ateev Mehrotra et al., “What Impact Has COVID-19 Had on Outpatient Visits?,” To the Point (blog), Commonwealth Fund, Apr. 23,
97% OF PRACTICES HAVE EXPERIENCED A NEGATIVE FINANCIAL IMPACT DIRECTLY OR INDIRECTLY RELATED TO COVID-19.

ON AVERAGE, PRACTICES REPORT A 55% DECREASE IN REVENUE AND 60% DECREASE IN PATIENT VOLUME SINCE THE BEGINNING OF THE COVID-19 CRISIS.
• “As it looks now, it is likely I will have to close the practice.”
• “No elective surgeries or procedures and no preventive healthy visits make it nearly impossible to make my rent.”
• “I can see my practice failing before my eyes.”
• “As a private primary care practice, we were already struggling with high rent, employee costs, and declining reimbursement. With the loss of the revenue stream from decreased patient visits we are through. I anticipate closing our practice in the next several months.”
• “I can survive only for few weeks, after that closing the practice and early retirement are inevitable.”
• “We have furloughed entire staff. It’s not clear when we can re-open. I am concerned my private practice will close permanently.”
• “Doing 98% telehealth. I can't offer any elective surgeries and I'll see a drastic decrease in payments in the next 2-3 months. It's moral agony to know I have cancer patients but have to delay their care.”
• “Dooms day! Scariest days and nights. For all staff, MDs as well as patients. My family is at edge due to potential COVID-19 exposure, financial strains and mental cloudiness.”

Source: COVID-19 Physician Financial Health Survey, California Medical Association
The Decision to Resume Procedures Will Vary By Practice

- Applicable state orders and restrictions
- Association guidelines (e.g., AOA, ACOS)
- Local COVID-19 infection rate
- Practice preparedness
- Economics related to the type of practice (e.g., primary care or surgical)
- Doctor/Practice owner’s comfort level
- Consumer demand
Americans Divided on Whether Coronavirus Situation Is Getting Better or Worse

What's your impression of the coronavirus situation in the U.S. today?

- % Getting better
- % Staying the same
- % Getting worse

GALLUP PANEL, 2020
Uncertainty about the duration of the situation, the economy, and overall public health are top concerns for Americans

Largest concerns of the US population related to COVID-19¹
% of respondents who are very concerned or extremely concerned

- Not knowing how long the situation will last: 64%
- The US economy: 62%
- Overall public health: 62%
- Health of my relatives in vulnerable populations: 58%
- Safety of myself or my family: 54%
- Taking care of my family: 48%
- My personal health: 44%
- Impact on upcoming events: 43%
- Contributing to the spread of the virus: 41%
- Not being able to get the supplies I need: 39%
- Negative impact on my job or income: 38%
- Impact on upcoming travel plans: 38%
- Not being able to make ends meet: 35%

64% of Americans are very or extremely concerned about the uncertainty of the duration of the COVID-19 situation

¹ Q: What concerns you most about the COVID-19 situation? Possible answers: “not a concern”, “minimally concerned”, “somewhat concerned”, “very concerned”, “extremely concerned.”

Consumers continue to feel the financial impact of COVID-19 and expect to cut back on spending

Overall sentiment in the general population in US

1. Q: Please indicate how strongly you agree or disagree with each of the following statements. Please select only one response for each statement; figures may not sum to 100% because of rounding.
2. Measures difference in “strongly agree / agree” between current and last pulse survey.

Americans believe that the personal and financial impact of COVID-19 will last well beyond two months

**Adjustments to routines**

- More than one year: 14%
- 7–12 months: 16%
- 4–6 months: 27%
- 2–3 months: 33%
- 0–1 month: 9%

**Impact on personal/household finances**

- More than one year: 16%
- 7–12 months: 13%
- 4–6 months: 24%
- 2–3 months: 19%
- 0–1 month: 6%
- No impact: 22%

~91% believe it will take **2+ months** before routines can return to normal, up from 89% in the last pulse survey.

~72% believe their finances will be impacted for **2+ months** by the COVID-19 situation, same as the last pulse survey.

1. Q: How long do you believe you need to adjust your routines, given the current COVID-19 situation, before things return back to normal in the US (e.g., government lifts restrictions on events/travel)? Figures may not sum to 100% because of rounding.

2. Q: How long do you believe your personal/household finances will be impacted by the COVID-19 situation? Figures may not sum to 100% because of rounding.

Media Consumption in the Age of COVID-19

Up to 70% are delaying major purchases until outbreak decreases or ends – BUT:

- 95% of global consumers say they are spending more time on in-home media consumption/activities
- 67% are watching more news coverage
- 53% are spending more time socializing as a family
- 51% are watching more streaming shows like Netflix
- 48% are watching more broadcast TV, while 48% reported watching more streaming TV
- 45% are spending more time on social media
- 35% are listening to more streaming services

#### Intent to use after COVID-19

**Low (<45%)**

**Medium-high (>45%)**

---

1. Q: Compared to now, will you do or use the following more, less, or not at all, once the coronavirus (COVID-19) situation has subsided? Possible answers: “will stop this”, “will reduce this”, “will keep doing what I am doing now”, “will increase this.”

2. User growth is calculated as % of respondents who replied that they are new users over % of respondents who replied that they were using the product/service pre-COVID (using more, using the same or using less).

Time respondents would feel comfortable returning to various sites of care

% of respondents, n = 1,265

- I don’t know: 14%
- More than 1 month after: 39%
- Within 1 month after: 16%
- Immediately after the pandemic ends: 14%
- Today: 17%

Sites:
- Physician’s office: 12%
- Urgent care clinic: 11%
- Emergency room: 10%
- Hospital facility: 10%
- Outpatient surgical center: 11%
Looking ahead

Many respondents indicated a willingness to reschedule care earlier with prompting from providers, with provider availability the main consideration for when respondents intend to reschedule care.

Considerations for when to reschedule healthcare appointments\(^{18}\)

- Provider availability: 57%
- Safety of care site / risk of exposure: 38%
- Symptoms could wait to be treated: 26%

% of medical appointments to be rescheduled, \(n = 784\)

Reasons respondents might reschedule earlier\(^{19}\)

- Doctor actively contacting to reschedule: 50%
- Worsening symptoms: 36%
- State and federal governments relaxing public health restrictions: 29%
- Site of care not seeing COVID-19 patients: 15%

% of respondents who reported waiting until COVID-19 pandemic subsides to reschedule appointments, \(n = 446\)
Takeaways From the Consumer Research

- Some patients will likely be open to seeing you now, others will take more time
- Many patients are understandably worried about contracting COVID-19, both in general and when receiving treatment
- Most patients are wary of spending money
- Active efforts on your part can help get patients to reschedule procedures!
Creative Direction for All Your Messaging

• Acknowledge the current situation wherever possible, directly or subtly
• Be transparent
• Scenes of large crowds, handshakes or parties look strangely, “out of touch,” right now
• Be highly careful of looking exploitative – even if that is not your intention!
• Make sure you don’t have any unintended messages (words like dying, virus)
• Have empathy – people are grieving!
Should you hold off on your marketing until you are fully operational and things are back to “normal?”
No! But depending on your situation, it might make sense to pause advertising.
6 MARKETING CATEGORIES

- Internal Marketing
- Doctor Referral Building
- Digital Marketing
- Traditional Advertising
- Branding
- Public Relations
Even if You Are Presently Closed, Take This Opportunity to Invest in the Long-Term

- Many of your competitors are frozen – and doing nothing
- Your job at the very least is to plan and prepare for the future
- Even if you are partially or fully closed now, you can invest in the long-term while staying relevant in the short term
  - Create up-to-date COVID-19 notices
  - Marketing planning
  - Creative work including branding
  - Long-term digital marketing projects
  - Strengthen your employee and provider communications (larger organizations)
  - Update your social media and email patients

To Our Patients

In response to the COVID-19 outbreak and Guilford County's issuance of a stay-at-home order - effective Friday, March 27, 2020, our office will temporarily close. We will remain closed until re-opening on Monday, May 11th, or longer based on Governor Cooper's recommendations in the coming days.

If you have an emergency, please call our after-hours number of 336-601-8346 and the on-call doctor will return your call to speak with you about your concerns. If you have an appointment scheduled in our office prior to April 13th, we will call you to reschedule.

We hope you and your family stay healthy and safe!

Sincerely,
Dr. Mark Featherston, Dr. Brent Greenberg & the staff at Carolina Vein Specialists
Use organic social media to grow your reputation - and save lives

Use Facebook and Instagram to inform patients and the public:

- Promote social distancing and safety
- Help people who think they may have the virus
- Provide wellness tips
- Assure the public you are taking proper safety precautions
- Answer frequently asked questions

Remember blogs and patient emails!

PLEASE COME IN
Internal Marketing Strategies

• Ensure to update the COVID-19 safety notice(s) on your website
• Create a video to emphasize your COVID-19 safety procedures
• Call / text patients who postponed visits or procedures to reschedule them
• Use email to get the word out en masse (link to your safety page/ video)
• Ask satisfied patients for referrals
Critical Phone Handling Solutions

1. Assure patients your COVID-19 precautions help ensure their safety
2. Set your team up to succeed
3. Hire right - pay right
4. Script and train them
5. Track inquiries and results
6. New patient inquiries are high priority and especially difficult
7. Get the call off the front desk
8. Objective is a first visit
9. Nominate your best phone people
10. Get patients in quickly
5 CRITICAL COMPONENTS OF ANY EFFECTIVE PHONE CONVERSATION

1. Establish rapport with a perfect greeting
2. Discover the need
3. Establish value
4. Dual alternative close
5. Answer objections, including COVID-19
Rebuild Primary Care Referrals

• Review and prioritize past referral sources
• Reach out to them to update them, and see how THEY are doing (phone, text, email or fax)
• Have your physician liaison visit when possible
• Consider digital B2B strategies if physical access not yet appropriate or possible
Digital Marketing

• Update your website (or create a new one)
• Search engine optimization
• Create a system to improve your online reviews
• Organic social media posts
Does Digital or Traditional Advertising Make Sense for You Now?

Yes, when you…

• Are open and want to attract patients now, OR
• Want to build market share while others flee the market (we are seeing this)
• Can position yourself as a community thought leader, and want to help educate the public during the COVID-19 crisis
• Want to build your brand for the long-term - and capitalize on your competitors’ absence from the marketplace
• Enjoy a reasonable marketing budget

Probably not if you are currently closed, and

• Can only invest in direct response advertising, where every dollar must bring an immediate, trackable ROI
• Are struggling financially, or only have access to a very limited marketing budget
Paid Search is usually the fastest and most cost effective advertising method to get new patients. Closely monitoring our clients’ accounts throughout the COVID19 crisis, our digital team has observed:

- Many elective-based inquiries (not necessarily clicks) are down.
- Some specialties are seeing increased CTR and lead conversions, e.g., urgent care, addiction, primary care.
- Other essential medical categories are “holding strong,” like cancer related searches.
- The types of search phrases we see are evolving, like “preventative care,” and “boost immune system.”
- We predict some more decreases in costs per click, especially as competitors continue to leave the marketplace.
Google Ads

Recommendations:

• **Focus your keywords on the most action-based, specific terms**
• Make sure your ads read appropriately for our new reality
• Closely monitor keyword searches and campaign results as consumer behavior continues to change
• Be prepare to pivot!
• Make adjustments to keywords and landing pages as appropriate
• Google prohibits capitalizing on COVID-19; avoid direct references
• Consider opportunities like, telemedicine, “televisitation,” and free transportation
• Consider spending more on display advertising, native advertising and YouTube as patients spend more time online, not necessarily actively searching
• Note: Google will provide up to $340 million in credits to SMBs in 2020 (must have been advertising since Jan 2019)

### LESS TIME
- **IN CAR**: 32%

Source: Custom Nielsen study conducted March 20-22 via an online survey, based on a weighted sample of 1000 adults 18+
Advertising

• Streaming radio and television are our favorite opportunities. (Billboards and print, “not so much.”)

• Viewership and listenership are up, while advertisers are fleeing the marketplace due to the COVID-19 crisis, cancelled Olympics, and fewer political ads.

• Create ads that convey positive messaging to the community and encourage media outlets to partner with clients.

• Have your agency leverage media relationships to negotiate media support for clients during this “challenging” marketplace. Don’t be afraid to “ask” the media for more. They are willing to help now.

• For example, in Chicago our media buyer was able to negotiate 80 free community-oriented radio spots, while also changing the mix to include more streaming.

• In Texas, when our multi-location client asked us to move budget to TV, our radio rep provided us 180 free spots across three stations as a measure of long-term goodwill.
Final Words

• There is pent up demand, but some patient “personas" will act sooner than others
• Campaigns continue to get interest, but conversion rates (inquiries) may lag behind historical norms
• Monitor results continuously and stay prepared to pivot
• The recovery will take time - try to be patient
• Things will likely never be the same again - but that can also bring about new opportunities
